

Individual reflection

Henrik Lagergren

Week 2, April 2019

What do I want to learn or understand better?

We have decided to use React, which is a javascript library, for building our website. It will be a difficult task since all of the team members are novice to React, including me. So as of now I want to learn and understand how to code with React and improve my knowledge week by week.

How can I help someone else, or the entire team, to learn something new?

I'm totally new to react, but I think I will learn pretty fast. If that's the case I can help others in the team with code problems and other IT related problems. I will also continue to help other team members with their knowledge within Git and Github.

What is my contribution towards the team's use of Scrum?

It's hard to tell since we haven't begun working with SCRUM yet. That's probably a question for next week.

What is my contribution towards the team's deliveries?

I've been on time and active in all of our meetings. I've also tried to come up with different ideas and solutions for our mockup. The business canvas model wasn't that easy to contribute to, but I tried my best. I also helped others in the team to understand and get started with Github.
