

Individual reflection

Henrik Lagergren

Week 3, April 2019

What do I want to learn or understand better?

I still want to improve my skills and understanding within React. I have realised that React is difficult to master, therefore I need to put down a lot of work the upcoming week to learn the basics. I also want to become better at writing user stories and break them down to smaller tasks.

How can I help someone else, or the entire team, to learn something new?

I will continue to help other team members to improve their knowledge within Git and Github. I also think that I can help others with their code-problems.

What is my contribution towards the team's use of Scrum?

We have not begun to code yet and therefore there is not much contribution towards the team's use of Scrum. However, we now have specific roles within Scrum, and divided the whole team into smaller teams.

What is my contribution towards the team's deliveries?

I missed the first meeting of the week, but got updated with a short review the next meeting. I have done my best to be active and productive in our meetings this week. I have contributed to several tasks, for example the team reflection, merging branches and set up scrum.
