Individual reflection

Ellen Widerstrand

Week 4, April 2019

What do I want to learn or understand better?

I still want to improve my knowledge about React. This is the first time that I use it and I think that I have a lot left to learn. I especially want to learn more about how the functions work. I also want to learn more about the use of Scrum and especially learn about how our KPIs can help us.

How can I help someone else, or the entire team, to learn something new?

I think that I still can help some members of the group to get a better understanding of git. I also think that everyone can help each other with the coding, since we are all quite new to the language (React).

What is my contribution towards the team's use of Scrum?

This week I got to be the project owner for two user stories. I had some comments about the design and code, which the developers changed. We have tried to get a better structure of our use of scrum this week, which I have helped forming. We decided to have daily scrum in a Slack channel, which I have contributed in.

What is my contribution towards the team's deliveries?

We were divided into three coding-groups this week and each group was assigned one or more user stories. The work that me and my coding-partner did met all the acceptance criteria for our user stories. We also participated in merging all groups work together and had a big role in getting everyone's code to work together. I also helped with this week's team reflection and wrote the sprint retrospective.
