Individual reflection

Ellen Widerstrand

Week 2, April 2019

What do I want to learn or understand better?

We decided that we will use React, which I have not used before, and therefore want to learn more about. For next week, I want to learn the basics of React, and week by week improve my knowledge about it.

How can I help someone else, or the entire team, to learn something new?

I can help the people in the group who just last week learned about how to use GitHub, to improve their knowledge about it. I can also help them get a better understanding of coding in general.

What is my contribution towards the team's use of Scrum?

The group has mainly focused on the project idea this week and have therefore not worked so much with Scrum.

What is my contribution towards the team's deliveries?

The group has agreed on most of the details of the project idea, which made it possible to finish the Business Model Canvas, Mockup and description. We worked as a team and everyone contributed with different parts. I draw the Mockup, while discussing the design with the other members of the group. I also helped the the group members from the I-program to set up Git on their computers and show them some basic git-commands.
