Weekly report, Sara Hillström

Sara Hillström

Week 2, April 2019

1 What do I want to learn or understand better?

As I wrote last week I want to further develop my understanding of the different programs used in the project. I especially want to learn more about React and eventually be able to work independetly in that program (all though that is a long term goal. Short term for next week I would like to learn the basics of React.

2 How can I help someone else, or the entire team, to learn something new?

My knowledge within business value and business creation, in this course applied to IT-solutions, is something that I think was be helpful to the team members from the IT-program and in the making of the business model canvas. Other than that I believe that I can help the team in increasing the team spirit and working in a structured way.

3 What is my contribution towards the team's use of Scrum?

This week we haven't really worked with Scrum, it has been more about creating a project idea with a clear business need and value, as well as continuing to develop our social contract and how we want to work.

4 What is my contribution towards the team's deliveries?

This week I made a contribution in finishing the business model canvas and the project description, as well as taking part in the discussion of what program to

use.
